Drought Task Force Update

- Drought Task Force (DTF) Update dated 12/12/16 is attached.

RIVER FORECAST

Cal OES Coastal Region

River Forecast - The following rivers are forecast to be at Flood stage Thursday - Friday:

Humboldt County: Eel River at Fernbridge

Potential Impacts: The western half of the Eel Delta may be completely flooded, especially if at or above this level for an extended period of time. This include areas northwest of Loleta, Cannibal Island Road. A Special Action Advisory is being issued to all owners of livestock in low-lying areas of the Eel Delta. These animals are at risk due to rising river levels, and appropriate action should be considered.

Mendocino County: Navarro River at Navaro

Potential Impacts: Water will flow over the south bank of the river approximately 1 mile east of Highway 1, and begin to flood property in this area including six homes. Expect closure of Highway 128. Motorists should use alternate routes.

River Forecast - The following rivers are forecast to be at monitor stage this week:

- Del Norte County: Smith River at Doctor Fine Bridge
- Del Norte County: Klamath river at Klamath
- Humboldt County: Mad River at Arcata, Eel River at Scotia, Van Duzen River at Bridgeville
- Mendocino County: Russian River at Hopland

Cal OES Inland Region

River Forecast - The following rivers are forecast to be at Flood stage Thursday - Friday:

Tehama County: Sacramento River at Tehama Bridge

Potential Impacts: Between 213.0 and 214.0 Feet the county park becomes inaccessible. Lower trailer park slots (temporary slots) start to flood.

Tehama County: Sacramento river at Vina Woodson bridge

Potential Impacts: Woodson Bridge Park is closed due to flooding. Water is up to the top steps of the recreation center at Driftwood RV Fishing Resort on the east bank of the river.

Glenn County: Sacramento River at Ord Ferry

Potential Impacts: Designated flood stage. Design overflow level for M&T, 3BS and Goose Lake Flood Control facilities to divert flood flows into Butte Basin. M&T overflows closing River Road from Ord Ferry Road to Chico River Road. Ord Ferry Road is already closed.

River Forecast - The following rivers are forecast to be at Monitor stage this week:

- Glenn County: Sacramento River at Hamilton City
- Colusa County: Sacramento River at Colusa Weir, Sacramento River at Colusa Bridge, Sacramento River at Moulton Weir
- Sutter County: Sacramento River at Tisdale Weir
- Sacramento County: Cosumnes River at Michigan Bar
- Solano County: Sacramento River at Rio Vista

Service Interruptions:

- None reported.

Remote/Community Isolations:

- None reported.

WEATHER OF CONCERN

Weather of Concern

Two storm systems will impact California through Friday.

Storm #1 Timing: Tue afternoon 12/13 - Wed afternoon 12/14

- Location: Northern CA and northern/central Sierra
- Hazards/Impacts:
 - Heavy Rain (1-3 inches foothills/mountains)
 - Small stream and creek flooding
 - Rivers at monitor stage
 - Slick Roads
 - Heavy Snow - above 5500 feet (4-8 inches), slick roads and low visibility
 - Slick and icy roads, low visibility, blowing snow
 - Travel and outdoor activity impacts

Storm #2 Timing: Thursday morning 12/15 - Friday afternoon 12/16

- Location: Northern CA, Sierra, shifting into central/southern California by Thursday night
- Hazards/Impacts:
 - Heavy Rain - (3-5 inches foothills/slopes)
 - Small streams and creeks most susceptible to flooding in mountains and foothills
 - Some rivers in the valleys and northern California coast are forecast to be near or above flood stage
 - Burn Scar impacts are possible in and near recent fire areas in the Sierra and along the coasts
 - Debris flows are possible, especially if heavier rain falls in shorter period of time
 - Heavy Snow - (8-16 inches possible above 5500 ft.)
 - Slick/icy roads, low visibility
 - Blowing and drifting snow at pass level
 - Travel and outdoor activity impacts
- An Areal Flood Watch is in effect from Tuesday afternoon through early Friday morning for portions of northwest California.
- An Areal Flood Watch is in effect from Thursday afternoon through late Thursday night for the mountains, foothills, and northern to eastern Central Valley.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

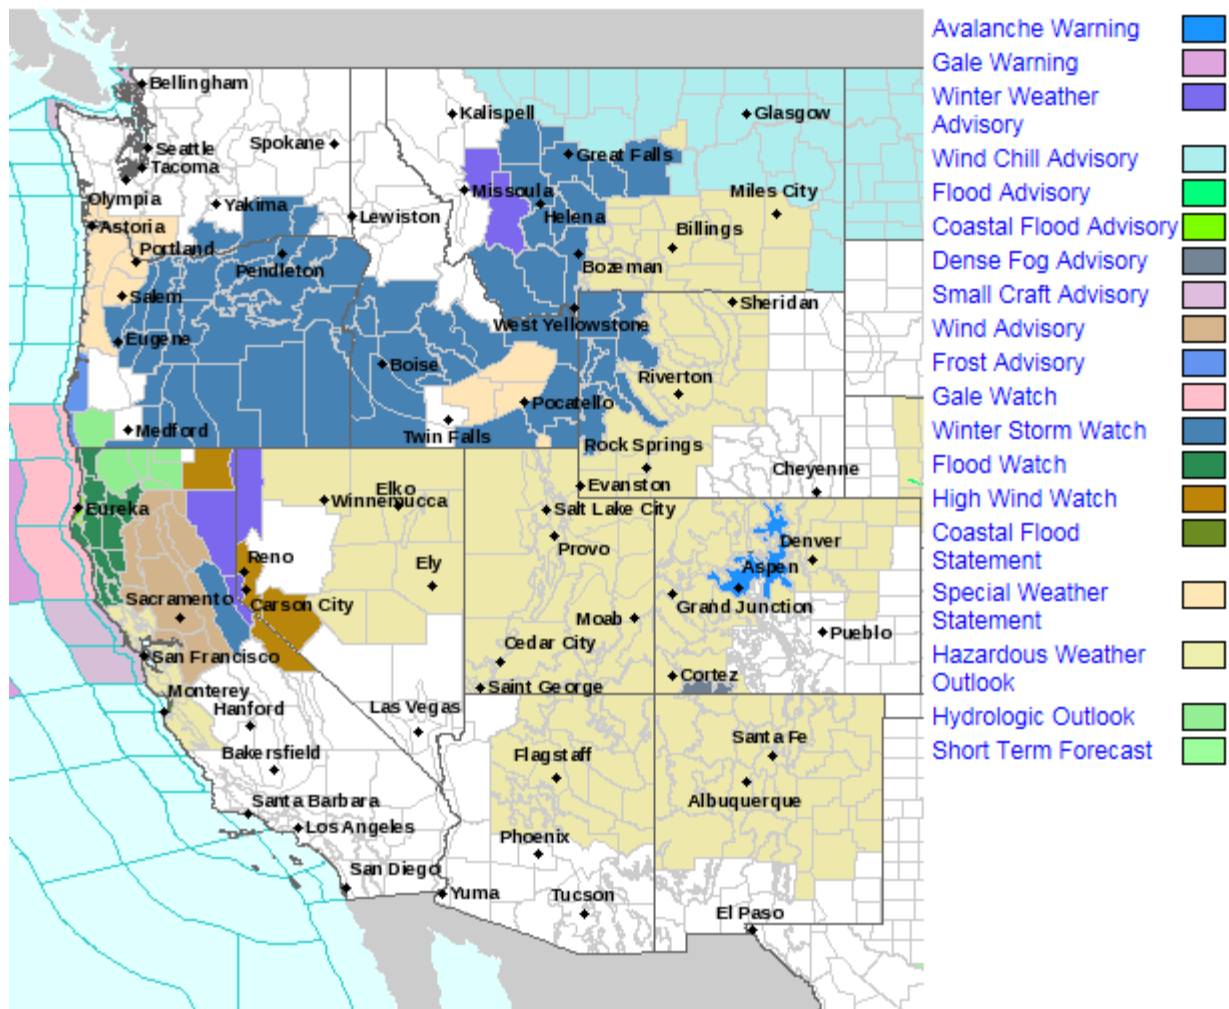

NORTHERN CALIFORNIA

Today precipitation will develop over the southern half of the Northern Geographic Area first and spread northward late in the day and overnight. It will take some time for precipitation to develop over areas near the Oregon border late today, and the southern areas will already be seeing decreasing precipitation in the evening. Most of the precipitation lingering tomorrow will be over the northern half of the region. Strong southerly winds are expected to develop in many areas late tomorrow ahead of a stronger, very wet system due to arrive Thursday. Precipitation will become much lighter and decrease from the north Friday. The weekend looks fairly dry but with some lingering mountain showers Saturday. Outside of some lingering cloudiness in the far north and eastern areas Sunday, it will probably be mostly sunny that day. Snow levels will vary quite a bit this week, rising with today into tomorrows system, but falling substantially again later Thursday into Friday. The lowest snow levels expected later this week are 2000-2500 feet in the far north and around 5000 feet in the south. Significant additions to the high elevation snow pack are probable this week. Lower elevation snow will create some snow-and-ice winter travel conditions. Areas with rather saturated soils may have trees susceptible to being blown over later tomorrow into Thursday during the windy period. Runoff is also expected to increase again in the region's water courses, which for some areas means they will run quite deep.

SOUTHERN CALIFORNIA

A moist westerly flow aloft across Northern and Central California will bring a period of showers to the central portions of the state starting today. Further south, weak high pressure will be the rule with partly cloudy, but dry weather expected through at least mid-week. Temperatures will be near normal for this time of year across much of the region through tomorrow. Winds will generally be 15 mph or less across the region through today. Rain chances will increase north of a line from Monterey to Fresno starting late tonight and continuing into tomorrow. Precipitation amounts could approach an inch in the Sierra Foothills north and west of Yosemite. Snow levels will be above 8,000 feet. Dry weather will prevail later tomorrow through early Thursday before another storm approaches the area. This next system will bring rain to the entire region starting first across the central portions of the state Thursday afternoon, then across Southern California Thursday night and Friday. Widespread rainfall amounts of one half to one and a half inches will be possible in the coastal and valley areas, with 1-3 inches in the foothills and mountains. It will be much colder on Friday with snow levels dropping down to near 4,000 feet. Variable cloudiness is expected this weekend with a few showers possible, mainly over the mountains. Temperatures are expected to be below normal over the entire area.
